Application Serial No.: 09/773,021

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

(Currently amended) A method for aggregating feedback, comprising:
receiving a first set of travel information including information identifying a
traveler, an itinerary of said traveler, and at least one travel service provider scheduled
to provide services to said traveler;

automatically generating after completion of travel associated with said itinerary, by a processor, a feedback request based on said <u>itineraryfirst set of travel information</u> and requesting specific feedback regarding said at least one travel service provider;

transmitting said feedback request to said traveler;

receiving feedback information from said traveler; and

analyzing said feedback information received from said traveler by said processor.

- 2. (Original) The method of claim 1, wherein said first set of travel information is received from a travel organizer.
- (Original) The method of claim 2, wherein said analyzing further comprises: determining whether at least a portion of said feedback information should be provided to said travel organizer.
- 4. (Previously presented) The method of claim 1, wherein said automatically generating further comprises:

comparing a travel completion date from said first set of travel information to a current date.

5. (Original) The method of claim 1, wherein said automatically generating further comprises:

determining a type of said at least one travel service provider; and generating said feedback request based on said type.

- 6. (Previously presented) The method of claim 4, wherein said type is one of at least an airline, a car rental, a hotel, and a travel agency.
 - 7. (Original) The method of claim 1, wherein said analyzing further comprises: determining whether said feedback information includes a complaint.
- 8. (Original) The method of claim 7, wherein said analyzing further comprises: determining whether said complaint requires a response from said at least one travel service provider.
- 9. (Original) The method of claim 8, wherein said analyzing further comprises: monitoring said complaint to determine whether a satisfactory response from said at least one travel service provider has been received.
 - 10. (Canceled)
- 11. (Original) The method of claim 1, wherein said analyzing further comprises: determining whether at least a portion of said feedback information should be provided to said at least one travel services provider.
- 12. (Currently amended) A computer-implemented method for aggregating feedback, comprising:

receiving a first set of travel information including information identifying a traveler, an itinerary of said traveler, and a plurality of travel service providers scheduled to provide services to said traveler;

generating after completion of travel associated with said itinerary, by a processor, a feedback request form for each of said plurality of travel service providers

<u>associated with said itinerary</u>, requesting specific feedback based on each of said plurality of travel service providers <u>associated</u> with said itinerary:

generating a summary feedback request form requesting general feedback for <u>based on</u> said itinerary and each of said plurality of travel service providers <u>associated</u> <u>with said itinerary</u>;

transmitting each of said feedback request forms and said summary feedback request form to said traveler;

receiving feedback information from said traveler, including completed ones of said feedback request forms and said summary feedback request form; and analyzing said feedback information received from said traveler by said processor.

- 13. (Original) The computer-implemented method of claim 12, wherein said first set of travel information is received from a travel organizer.
- 14. (Original) The computer-implemented method of claim 12, wherein said analyzing comprises:

reviewing information from each one of said feedback request forms and said summary feedback request form to determine whether any resolution is required.

15. (Original) The computer-implemented method of claim 12, wherein said analyzing comprises:

determining whether said feedback information received from said traveler includes a complaint.

16. (Original) The computer-implemented method of claim 12, wherein said analyzing comprises:

determining whether said feedback information received from said traveler includes a request for a response.

17. (Original) The computer-implemented method of claim 16, further comprising:

generating a request for a response from one of said travel service providers; and

monitoring said request for a response to determine if said travel service provider properly responds.

18. (Currently amended) An apparatus for aggregating feedback, comprising: means for receiving a first set of travel information including information identifying a traveler, an itinerary of said traveler, and at least one travel service provider scheduled to provide services to said traveler;

means for automatically generating after completion of travel associated with said itinerary, a feedback request based on said <u>itinerary first set of travel information</u> and requesting specific feedback regarding said at least one travel service provider; means for transmitting said feedback request to said traveler; means for receiving feedback information from said traveler; and means for analyzing said feedback information received from said traveler.

19. (Currently amended) An apparatus for aggregating feedback, comprising: a processor; and

a storage device in communication with said processor and storing instruction adapted to be executed by said processor to:

receive a first set of travel information including information identifying a traveler, an itinerary of said traveler, and at least one travel service provider scheduled to provide services to said traveler;

automatically generate after completion of travel associated with said itinerary, a feedback request based on said <u>itinerary first set of travel information</u> and requesting specific feedback regarding said at least one travel service provider;

transmit said feedback request to said traveler; receive feedback information from said traveler; and analyze said feedback information received from said traveler.

20. (Currently amended) A machine-readable medium having stored thereon data representing sequences of instructions, said sequences of instructions which, when executed by a processor, cause said processor to:

receive a first set of travel information including information identifying a traveler, an itinerary of said traveler, and at least one travel service provider scheduled to provide services to said traveler;

automatically generate after completion of travel associated with said itinerary, a feedback request based on said <u>itinerary first set of travel information</u> and requesting specific feedback regarding said at least one travel service provider;

transmit said feedback request to said traveler; receive feedback information from said traveler; and analyze said feedback information received from said traveler.
